Catalog of Publications per Main Pedagogical Purpose

Open-Source Hardware in Education: a Systematic Mapping Study

June 25, 2018

BoostCreativity

---

[1] W. Aprile and A. Van Der Helm. Interactive technology design at the delft university of technology - a course about how to design interactive products. In *13th International Conference on Engineering and Product Design Education*, pages 553–558, 2011.

[2] N. Arora, N. Agarwal, and S. R. N. Reddy. Funpi: An interactive learning experience using story narration. In *Proceedings of the Sixth International Conference on Computer and Communication Technology 2015*, ICCCT '15, pages 398–402, New York, NY, USA, 2015. ACM.

[3] D. Bar-El and O. Zuckerman. Maketec: A makerspace as a third place for children. In *10th International Conference on Tangible, Embedded, and Embodied Interaction*, TEI '16, pages 380–385, New York, NY, USA, 2016. ACM.

[4] J. Brey, D. Mizzy, and R. Goldberg. A maker-in-residence program to build a community of makers. In *ASEE Annual Conference and Exposition*, volume 14, 2017.

[5] A. Butterfield and K. Branch. Results & lessons learned from a chemical engineering freshman design laboratory. In *ASEE Annual Conference and Exposition*, Seattle, WA, USA, 2015.

[6] H. Choi and J. Park. New creativity examined with e-textiles: Bridging arts craft and programming. *Proceedings of International Conference of the Learning Sciences, ICLS*, 2:1181–1182, 2016.

[7] K. Chorianopoulos, L. Jaccheri, and A. S. Nossum. Creative and open software engineering practices and tools in maker community projects. In *4th ACM*

SIGCHI Symposium on Engineering Interactive Computing Systems, EICS '12, pages 333–334, New York, NY, USA, 2012. ACM.

[8] D. Cuartielles. Opensource hardware and education. *Lecture Notes in Computer Science (including subseries Lecture Notes in Artificial Intelligence and Lecture Notes in Bioinformatics)*, 9083, 2015.

[9] B. Dixon. Code isolation for accurate performance scoring using raspberry pis. *J. Comput. Sci. Coll.*, 31(4):94–99, Apr. 2016.

[10] D. A. Fields, K. A. Searle, and Y. B. Kafai. Deconstruction kits for learning: Students' collaborative debugging of electronic textile designs. In *Proceedings of the 6th Annual Conference on Creativity and Fabrication in Education*, FabLearn 16, pages 82–85, New York, NY, USA, 2016. ACM.

[11] C. Gajewski. Interactions you already know: Smart artifacts. *Design Principles and Practices*, 5(5):369–376, 2011.

[12] A. Garrigos, D. Marroqui, J. Blanes, R. Gutierrez, I. Blanquer, and M. Canto. Designing arduino electronic shields: Experiences from secondary and university courses. In *IEEE Global Engineering Education Conference, EDUCON*, pages 934–937, 2017.

[13] F. Geth, J. Verveckken, N. Leemput, J. V. Roy, J. Beerten, P. Tielens, V. D. Smedt, S. Iacovella, B. Hunyadi, N. Koolen, H. D. Clercq, G. Gielen, R. Puers, S. V. Huffel, R. Belmans, G. Deconinck, W. Dehaene, and J. Driesen. Development of an open-source smart energy house for k-12 education. In *IEEE Power Energy Society General Meeting*, pages 1–5, July 2013.

[14] J. Griffin, E. Kaplan, and Q. Burke. Debug'ems and other deconstruction kits for stem learning. In *IEEE 2nd Integrated STEM Education Conference, ISEC 2012*, 2012.

[15] N. Gupta, N. Tejovanth, and P. Murthy. Learning by creating: Interactive programming for indian high schools. In *2012 IEEE International Conference on Technology Enhanced Education (ICTEE)*, pages 1–3, Jan. 2012.

[16] V. Harini, M. Dharani, K. Balaji, and S. Pandian. Robots for the bottom of the pyramid: Mobile robot racing over the internet. In *IEEE Region 10 Annual International Conference, Proceedings/TENCON*, pages 751–755, 2017.

[17] D. Holman. Glassblowing: Forming a computational glass material. In *Sixth International Conference on Tangible, Embedded and Embodied Interaction*, TEI '12, pages 379–380, New York, NY, USA, 2012. ACM.

[18] Y. Huang and M. Eisenberg. Steps toward child-designed interactive stuffed toys. In *10th International Conference on Interaction Design and Children*, IDC '11, pages 165–168, New York, NY, USA, 2011. ACM.

[19] G. Isaakidis, A. Spiropoulos, and M. Drakaki. An educational purpose built three dimensional printer. In *6th International Conference on Modern Circuits and Systems Technologies, MOCAST 2017*, 2017.

[20] P. Jennings and D. Castro. Constructs toolkit: 802.15.4 wireless construction kit. In *2nd International Conference on Computational Creativity, ICCC 2011*, page 164, 2011.

[21] Y. B. Kafai, D. A. Fields, and K. A. Searle. Everyday creativity in novice e-textile designs. In *8th ACM Conference on Creativity and Cognition*, C&C '11, pages 353–354, New York, NY, USA, 2011. ACM.

[22] E.-S. Katterfeldt, N. Dittert, and H. Schelhowe. Eduwear: Smart textiles as ways of relating computing technology to everyday life. In *International Conference on Interaction Design and Children*, IDC '09, pages 9–17, New York, NY, USA, 2009. ACM.

[23] K. Kozak. Creating ideas into reality: Spaces and programs that open up the imagination. In *ASEE Annual Conference and Exposition, Conference Proceedings*, 2017.

[24] R. Krauss and C. VanderRoest. MAKER: A 3d printed balancing robot for teaching dynamic systems and control. In *ASEE Annual Conference and Exposition, Conference Proceedings*, 2017.

[25] V. Lee and D. Fields. A rubric for describing competences in the areas of circuitry, computation, and crafting after a course using e-textiles. *International Journal of Information and Learning Technology*, 34(5):372–384, 2017.

[26] B. Litts, Y. Kafai, D. Lui, J. Walker, and S. Widman. Understanding high school students' reading, remixing, and writing codeable circuits for electronic textiles. In *Conference on Integrating Technology into Computer Science Education, ITiCSE*, pages 381–386, 2017.

[27] A. Lorente-Leal, J. . n. Fernñndez Rodrigues, and J. M. Montero. Development of a wiimote-based gesture recognizer in a microprocessor laboratory course. In *IEEE EDUCON Conference*, pages 451–455, Apr. 2010.

[28] E. Lovell and L. Buechley. Lilypond: An online community for sharing e-textile projects. In *8th ACM Conference on Creativity and Cognition*, C&C '11, pages 365–366, New York, NY, USA, 2011. ACM.

[29] R. Meintjes and H. Schelhowe. Inclusive interactives: The transformative potential of making and using craft-tech social objects together in an after-school centre. In *Proceedings of the The 15th International Conference on Interaction Design and Children*, IDC '16, pages 89–100, New York, NY, USA, 2016. ACM.

[30] D. A. Mellis and L. Buechley. Scaffolding creativity with open-source hardware. In *8th ACM Conference on Creativity and Cognition*, pages 373–374, New York, NY, USA, 2011. ACM.

[31] A. Merkouris and K. Chorianopoulos. Introducing computer programming to children through robotic and wearable devices. In *Proceedings of the Workshop in Primary and Secondary Computing Education*, WiPSCE '15, pages 69–72, New York, NY, USA, 2015. ACM.

[32] L. Miao, J. Farzidayeri, W. Boles, and A. Nasab. An indoor bocce game played by autonomous robots. In *ASEE Annual Conference and Exposition, Conference Proceedings*, 2017.

[33] A. Minuto, F. Pittarello, and A. Nijholt. New materials = new expressive powers: Smart material interfaces and arts, an interactive experience made possible thanks to smart materials. In *Proceedings of the 2014 International Working Conference on Advanced Visual Interfaces*, AVI '14, pages 141–144, New York, NY, USA, 2014. ACM.
